SUPER SAVER

The Super Saver Model 2500 Car Wash System is the **operator's choice**. Loaded with the most advanced technology in the industry, this system can deliver an outstanding performance as well as give you years of trouble-free service. The Super Saver is ideal for your multiple bay car wash or for remodeled locations. The modular system includes the most popular self-service car wash functions on a pre-wired and pre-plumbed stainless steel framework. It arrives at your site ready to go and has a complete bay package as well.

This car wash system is available with on-board Reverse Osmosis Spot-Free Rinse and with the optional Money Manager Accounting System.

Features

- Low Pressure Tire Cleaner, Medium Pressure Pre-Soak, High Pressure Soap, Foaming Brush, Rinse, Foaming Conditioner, Clear Coat Protectant
- All Stainless Steel Construction
- Totally Self-Contained
- Removable Pump Assembly
- Model CAT 5CP2120 Pump, 4.0 GPM/1000 PSI
- Paraplate Regulators
- Automatic Chemical Mixing Tank
- Fused Terminal Blocks
- 3 HP 3 PH Motor
- High and Low Pressure Gauges
- Pre-Wired and Pre-Plumbed
- Low Voltage Electric Panels
- Stainless Steel Concentrate Tank
- Single V-Belt & Pulley
- Stainless Steel Belt Guards
- Easy Access to Chemicals
- System Lettering and Graphic Decaling
- E.T.L. Approved

Optional Bay Functions:

- Bug Remover, Triple Foam™ Brush
- Polyshell® Triple Shine™
- Spot-Free Rinse (Low or Medium Pressure)
- High Pressure Wax

PREP UNIT FOR WASH

Simple, compact, easy to operate Prep Units. Available as a one or two pump package. Typical prep units include high-pressure wash and rinse only. Additional functions can be added.

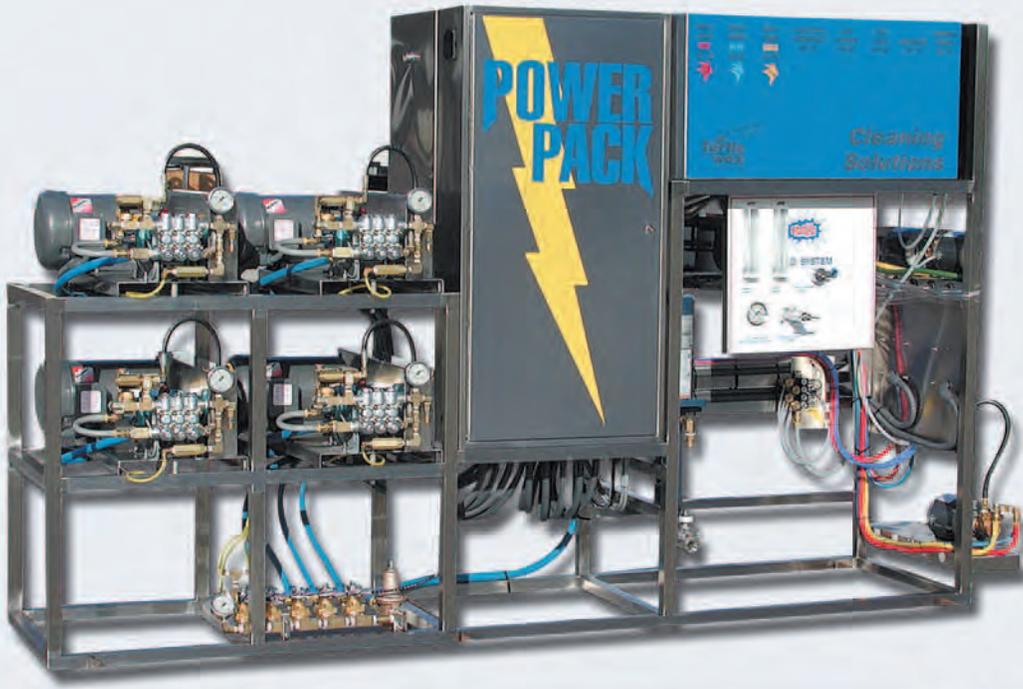

FREE STANDING ADD-ON SYSTEMS

TRIPLESHINE

Free-standing TripleShine® Systems are available to add to existing locations. Also available are free-standing Pre-Soak, Wax, Spot-Free Rinse, and Foam Brush Systems. If floor space is limited, units can be wall mounted. Constructed of stainless steel for durability. All are pre-wired and pre-plumbed and are decoded ready for easy installation.

POWER PACK

The Power Pack self-service car wash system is designed for the space conscious.

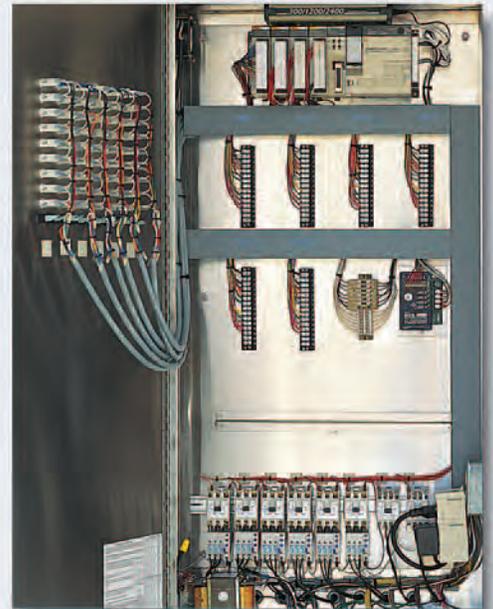

The modular stainless steel frame-work is about 25% shorter but still includes most of the same features as the Super Saver 2500.

Features

- Low Pressure Tire Cleaner, Medium Pressure Pre-Soak, High Pressure Soap, Foaming Brush, Rinse, Foaming Conditioner, Clear Coat Protectant
- All Stainless Steel Construction
- Totally Self-Contained
- Removable Pump Assembly
- Model CAT 5CP2120 Pump, 4.0 GPM/1000 PSI
- Brass Regulators
- Automatic Chemical Mixing Tank
- Fused Terminal Blocks
- 3 HP 3 PH Motor
- High and Low Pressure Gauge
- Pre-Wired and Pre-Plumbed
- Low Voltage Electric Panels
- Stainless Steel Concentrate Tank
- Single V-Belt & Pulley
- Stainless Steel Belt Guards
- Easy Access to Chemicals
- System Lettering and Graphic Decaling
- E.T.L. Approved

Optional Bay Functions:

- Bug Remover, Triple Foam™ Brush
- Polyshell® Triple Shine™
- Spot-Free Rinse (Low or Medium Pressure)
- High Pressure Wax

The stainless steel electrical wiring control panel houses the optional Money Manager Car Wash Accounting which is an essential management tool for tracking all income from your bays, vacuums and vending.

The low pressure control center is built with reliable pumps that include safety check valves, air and product regulators along with liquid filled pressure gauges.

IN-BAY SERVICES

Super Saver 2500 and Power Pack both offer a variety of income producing car care options to your customer. These are indicated by the meter decals shown here and described below.

Tire Cleaner cleans dirt and grime from tires.

Engine Cleaner helps keep engine clean from grease.

Bug Remover loosens bugs' bodies and bird droppings.

Pre-Soak loosens up road film and dirt.

High Pressure Soap rids the car of dirt and grime.

Foaming Brush releases heavy foam detergent for a

deeper scrubbing clean.

TripleFoam Foam Brush combines three aggressive and attractive colored detergents.

Rinse rids the car of soap and detergents.

Foaming Conditioner conditions the vehicle.

PolyShell Triple Shine produces a weather-tight layer of polymer protection.

Clear Coat Protectant gives the vehicle a "coat" of protection.

High Pressure Wax allows a wax coating for continued protection.

Spot-Free Rinse uses a reverse osmosis water purification process that leaves the vehicle free of spotting.

Each pumping unit is equipped with a complete bay package. (Shown with optional Final Rinse and Foam Brush Signs)

SPLASH-N-DASH

SPLASH-N-DASH 77555

Splash-N-Dash is a single bay self-contained car wash. It offers a wide variety of features including low pressure Tire/engine Cleaner using a special cutting solution to remove oxidized tire film and strips away engine grease and grime. High Pressure Wash ensures thorough cleaning, a soft-bristled foaming brush scrubs away hardened road scum. High pressure crystal clear water for a clean rinse. Finally a High-Gloss Wax to preserve and protect the finish. The equipment arrives pre-wired and plumbed, is fully assembled and ready to install wherever electrical power and fresh water connections are available. This stainless steel ensures all weather performance in any climate providing corrosion resistant, maintenance free care.

International models available.

Features

- All Stainless Steel Cabinet
- Colorful Instruction Sign
- Safety Trigger Gun, Spray Tip and Hoses
- 3 HP - 3 PH Electric Motor
- Model CAT 5CP2120 Pump, 4.0 GPM/1000 PSI
- 34" W x 32" D x 70" H
- 220 Volts 50/60 Cycles
- Shipping Weight: 775 lbs.

Customers or employees can easily use the single bay Splash-N-Dash System.

SPLASH-N-DASH 77500

The unit shown here is with optional 180 degree top mount booms.

The Splash-N-Dash has up to seven functions that include tire/engine cleaner, soap, rinse, wax.

The Splash-N-Dash is self contained so that it can be used easily at car dealerships and apartment complexes.

The 77500 model has all the features of the 77555 and more. It has a bay marketing meter, coin/token security box and a count-down timer.

Options

- Freeze Prevention System and Insulated Cabinet
- 180 degree Top Mount Boom
- 360 degree Spring-Loaded, Overhead Boom
- Single Phase
- 180 degree Wall Mount Boom
- 3000 Watt Submersible Heater

77560 INDUSTRIAL UNIT

- Same as Manual (77555) Plus:
- 5HP - 3PH Electric Motor
- 4 GPM @ 1500 PSI

SPLASH-N-DASH

THE MONEY MANAGER

The Ultimate in Car Wash Accounting Software

Exclusively designed by Jim Coleman Company, the Money Manager Car Wash Accounting System puts an end to accounting nightmares. The Money Manager System will keep you in touch with all of your locations, allowing for better management and increased profits. Providing you with a computerized report, the Money Manager System gives you a complete financial account of your car wash. The system also serves as a maintenance checklist by letting you know when a changer is down or if you are low on coins. With the Money Manager, you will always know what is happening at your car wash location at any time, day or night. You have total management control of your business with the Money Manager.

What if I have more than one location?

No problem. The Money Manager is designed to give the same reliable, computerized report on all of your car wash locations. This may be done from your home computer or at your office.

How often can I run reports?

As often as you like. You can output a report everyday, once a week or once a month...whenever you need to. The advantage of this is that you can compare past data to current data. You will be able see when your equipment has brought in the most revenue, which will help you in marketing and promoting your business. Another advantage of running reports any time you like is to make sure that your equipment is in service. The report will indicate if a piece of equipment is not working, and it will show you if your bill changers are low or out of change. The software can also be set-up to automatically call the sites(s) and download reports at

pre-scheduled times.

What all can the Money Manager System monitor?

It can monitor all of your bays, vacuums, vending machines, bill changers and even doors. You can get a total bay income as well as a breakdown on each function, such as the percentage of amount of soap, rinse or wax used. Each monitored equipment or function will show individual totals on a current and accumulated basis, a grand total and percentage of use. By having your doors monitored you will know when your employees are at work and when they are not.

How do I install the Money Manager?

When purchased along with your car wash equipment, the system is pre-wired with the exception of your doors and vacuums. However, the Money Manager may be installed in your existing car wash equipment. The hardware on-site consists of:

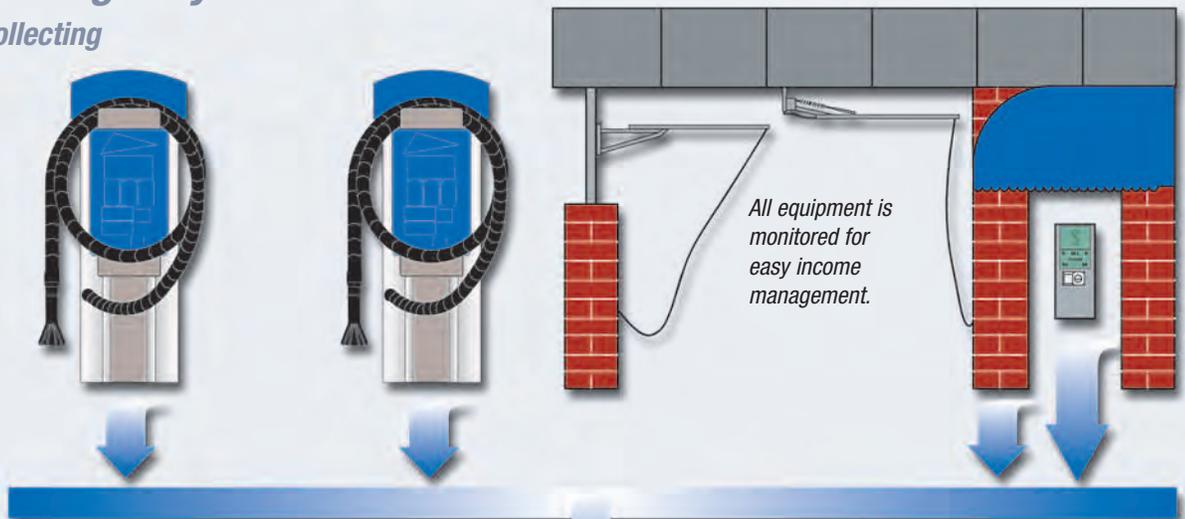

- Computer Central Process Unit
- EE Prom Memory Unit
- Computer Host Module
- Necessary Input/Modules
- 9600 Baud External Modem
- Cooling Fan
- Fiberglass Enclosure
- Installation Manual

Also needed off-site, but not included, are:

- Pentium Class PC with Windows 98 or later
- Printer
- Modem

The Money Manager System

Process of Data Collecting

The PC communicates with the PLC to deliver all information for your report. The PC may be located at your business or in your own home.

The PLC is installed at each car wash site which receives the data from every car wash and each piece of equipment.

Foaming Brush

The brush releases three bright and beautiful colors of foam which customers love to use.

TRIPLE FOAM BRUSH

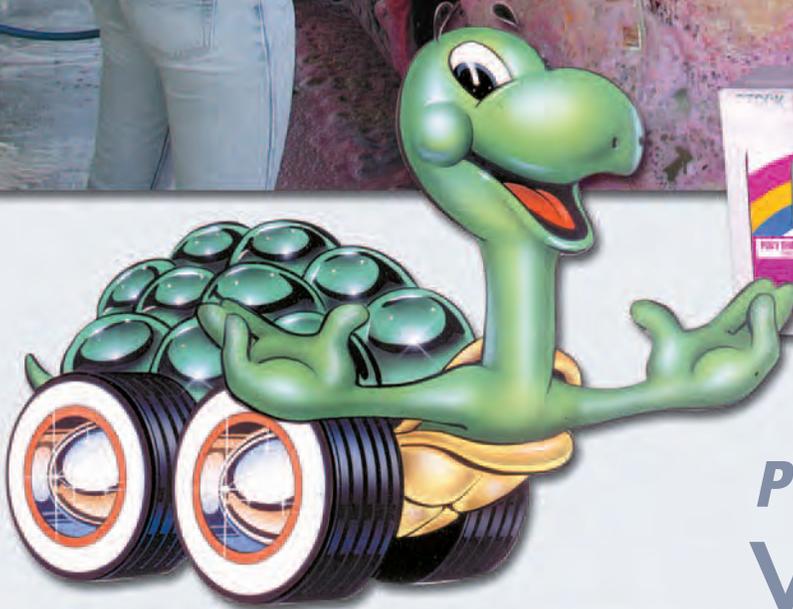

The Turtle Wax® Triple Foam Brush™ System for self-serve car washes combines three aggressive and attractive colored detergents with a patented application device. The foam brush delivers detergent that really cleans cars and looks great doing it. This show of colors will have customers coming back for more.... which means more profit for you!

Another great product by Turtle Wax® that can increase profits in the bay is Foaming Conditioner. By applying Foaming Conditioner with a special applicator, your customer can thoroughly condition his vehicle because it locks on a weather-tight layer of polymer protection. Foaming Conditioner guards sensitive clear coat finishes from nature's elements including harmful UV rays, leaving a mirror-like, hard-beading shine. A Clear Coat Protectant or Wax should be used after applying Foaming Conditioner for that final sealant.

FOAMING CONDITIONER

POLYSHELL TRIPLESHINE®

Your customers will love it! PolyShell® Triple Shine™ by Turtle Wax® gives you three bright colors of foaming conditioner and one deep, long-lasting protective shine! The unique red, blue and gold foam help in removing stubborn road grime and guards against U.V. rays. The next service is either a Clear Coat Protectant designed for clear coat finishes or a high pressure spray wax. The combination of the foaming conditioner and clear coat protectant or spray wax provides a deeper and longer lasting protective shine than any product used by itself.

Special Applicator

A special applicator gun is used when applying TripleShine to the car.

SPOT-FREE RINSE

Ultra Pure Water By Reverse Osmosis

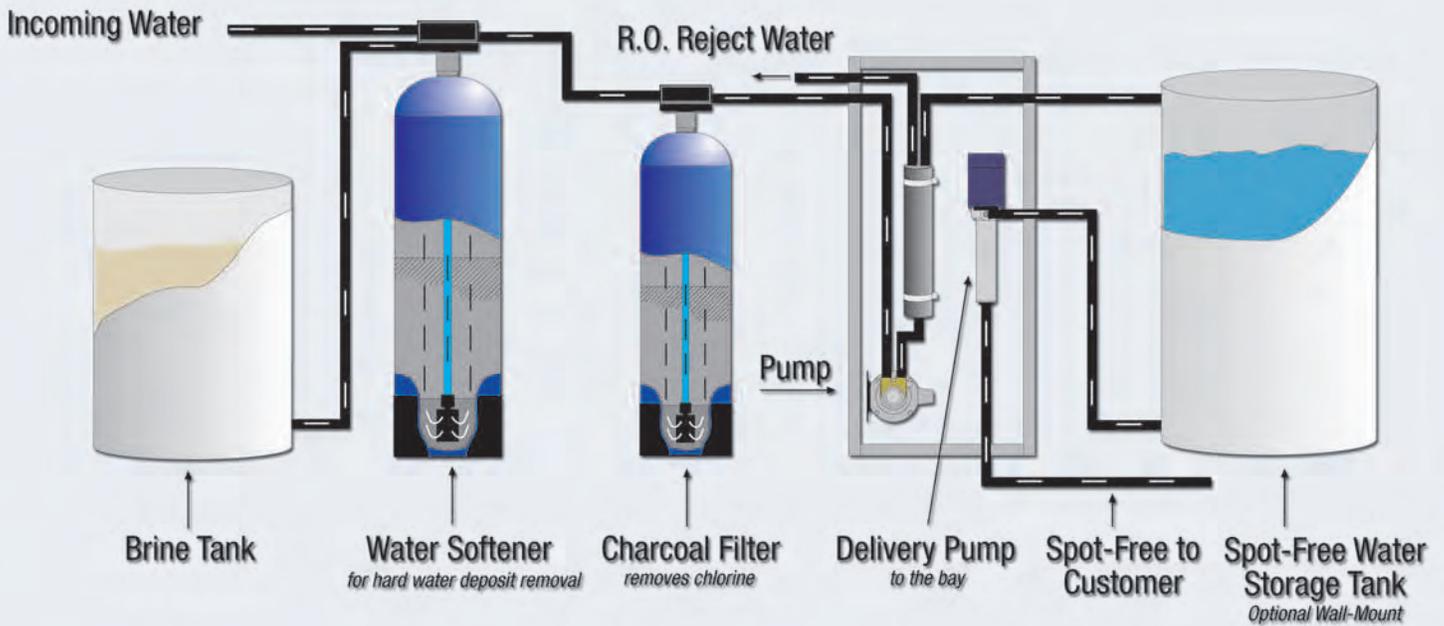

Promoting Spot-Free Rinse at your car wash adds to your in-bay profits.

Package Features (Based on 500 gpd)

- Stainless Steel Frame with Leveling Legs
- R.O. Production and Delivery System
- Thin Film Composite Membrane
- Stainless Steel Control Panel
- Computer Controlled
- Flow Meters
- Solenoid Valves
- Automatic Membrane Flush
- Low Pressure Cut-off
- Low Water Level Cut-off
- 1/2 HP -220 volt 1 PH Production Pump and Motor
- 1HP - 220 volt 1PH Delivery Pump and Motor
- ProCon Vane Pump
- Indicator Lights
- 5 Micro Pre-filter
- 1 Cubic Foot Charcoal Filter
- 175 gallon Polyethylene Storage Tank (31"D x 57"H)
- Spot-Free Rinse Sign
- 3' x 6' Spot-Free Rinse Banner
- E.T.L. Approved

Optional Features

- High Pressure Delivery
- Automatic Bay Delivery System
- Stainless Steel Arches
- Extra or Larger Tanks
- 1600, 3200, and 4800 gpd Systems Available

By installing a Sparkle Spot-Free Rinse Reverse Osmosis Water Purification System in your car wash, you can increase income and customer satisfaction. Spot-Free Rinse System removes TDS (total dissolved solids) in the water that softeners do not remove. Dissolved solids in the water causes spotting on the surface of automobiles. Normal water in the USA has an average of 300 ppm (parts per million) of dissolved solids. Objectionable spotting occurs in water with only 50 ppm or more. A Sparkle Spot-Free Rinse System removes 98% of TDS or usually to a level of 10 ppm or less. An RO (reverse osmosis) system consists of a charcoal filter, pump, membrane and storage tank. The charcoal filter filters the water and removes all chlorine to prevent damage to the membrane. The

pump receives city water pressure and increases it to force it through the membrane.

The Sparkle RO units use the best membrane available. The membrane separates the good water from the bad, and then the purified water is stored in a storage tank. The tank stores the water until the customer uses the Spot-Free Rinse System.

Engineering and Maintenance

Engineered with the best available components on the market, the Sparkle Spot-Free Rinse System will deliver low pressure *pure* water to the car wash bay. The Sparkle Spot-Free Rinse System can be installed “on-board” for newly purchased wash systems or separately for existing car washes. Installation can usually be done in a day, without downtime. Regular mainte-

nance can be done by the operator simply by changing prefilters and checking water for purity.

More Customers, More Profits

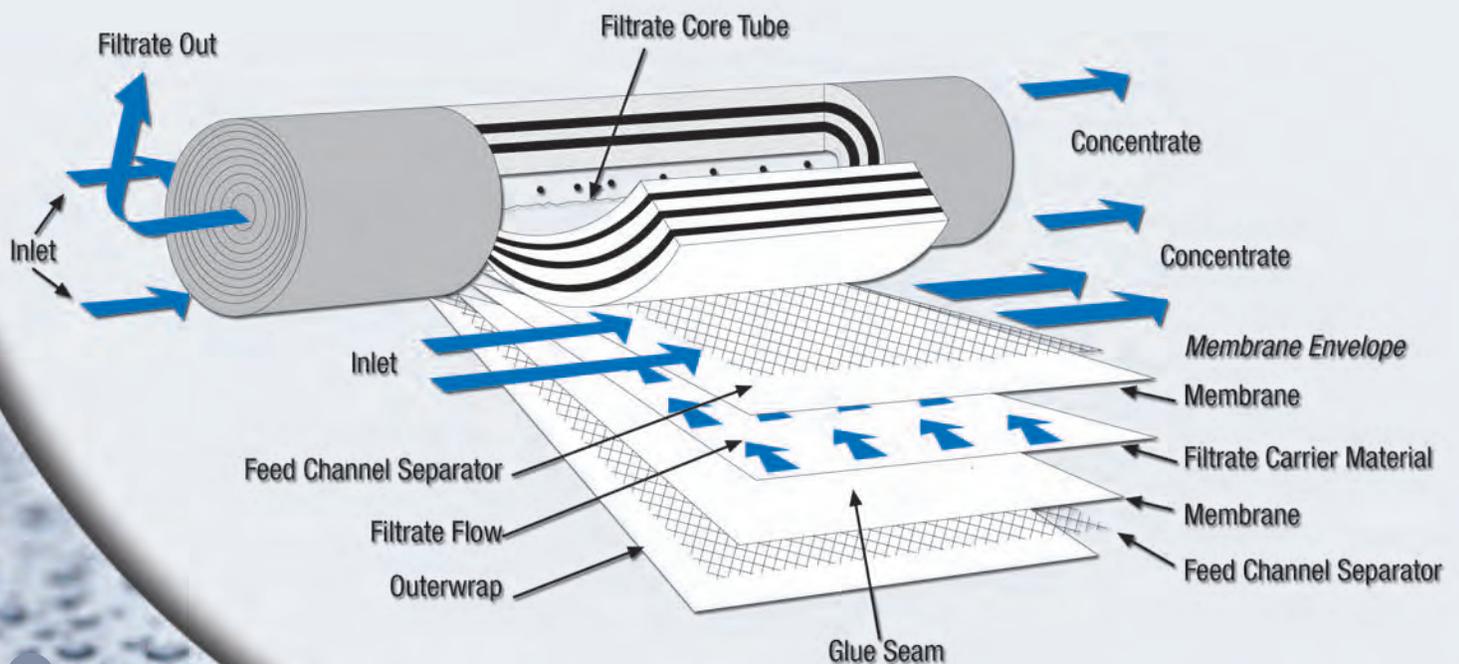

By offering RO with your car wash, you will not only gain satisfied customers, but you can also increase your bay income. RO can produce up to 12% of your bay income. This is the most cost-effective product in a bay giving you a high rate of return on investment.

Using Spot-Free Rinse Yields Ultra Pure Water For a Spotless Finish!

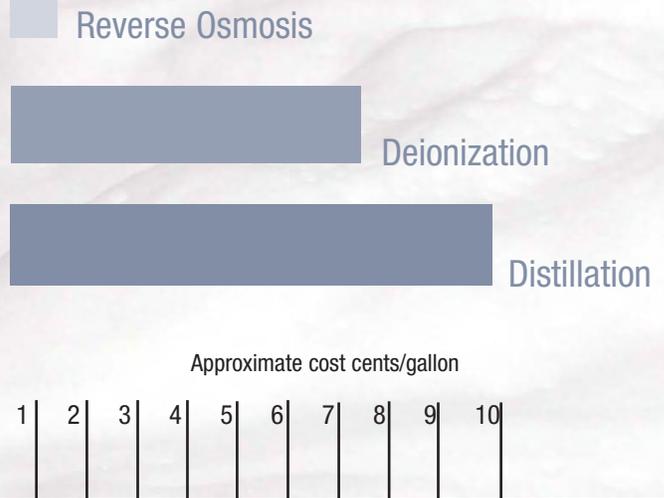

SPOT-FREE RINSE

The type of membrane used in the Sparkle Spot-Free Rinse Reverse Osmosis System is a thin film composite polyimide. At optimum operating conditions, this membrane removes over 98% of the dissolved solids in the water and nearly 100% of suspended particles, which includes heavy weight metals and organic molecules (see list). A programmable controller on-board the unit monitors spot-free production and automatically cleans the membrane with a flush cycle at the correct time. This allows the Jim Coleman Company to give a three year warranty on the life of the membrane. Flow meters on the unit allow proper monitoring of the RO production and reject.

Membrane Configuration

Comparative Operating Costs

Membrane	Thin Film Composite Polyimide
Maximum Operating Pressure	250 psi
Maximum Operating Temperature	90° F/ 32° C
Free Chlorine Tolerance	< 0.1 ppm

Chlorinated Pesticides	99

Spot-Free Rinse as installed "on-board" the Power Pack and Super Saver Car Wash Systems.

BAY MARKETING METERS

Several models of bay meters are available for your self-service car wash. Manufactured of stainless steel, these meter boxes are designed with your choice of single or dual coin drop and are available in two sizes. The 23000 Bay Meter is equipped with a digital countdown timer that indicates price and time remaining. The 24000 Bay Meter has “Bay ready For Use” and “Timer On” indicator lights.

Meters are offered in multiple configurations. Manufactured of stainless steel most can be designed to accept one and five dollar bills, multiple coin types and code entry. The 23000 series has available an eight or ten position rotary switch or the Select-N-Touch keypad and has a digital countdown timer.

24000 Series

- Indicator Lights Showing “Bay Ready for Use and Timer On”
- 8 position rotary switch
- Electronic Coin Acceptor
- Meter Heater and Drying kit
- Cam Lock
- Door Gasket
- Stainless Steel Meter Hull, Door, and Hinge
- 12”X12” Price Sign
- Size: 9 3/8” X 14”H X 8”D
- Weight: 21 lbs

- Electronic Coin Acceptor
- Meter Heater and Drying kit
- Two Cam Locks
- Door Gasket Stainless Steel Meter hull, door and hinge.
- 12” X 12” Price Sign
- 12” X 12” Last coin alert Sign
- Size: 12” W X 18”H X 8”D
- Weigh: 32 lbs

Options

- Bill Acceptor to accept one & five dollar bills only
- Select-N-Touch keypad with or without Swipe-N-Clean
- Multiple Coin Acceptor

23000 Series

- Available with 8 or 10 position rotary switches
- Countdown timer with last coin alert

Bill Acceptance

Accepting bills in the wash bay makes washing a car much easier for your customers and brings additional income to you. Customers spend more time in the bay if they do not have to leave to get change.

Select N Touch

The Select N Touch has a multi-functional push button control keypad. This allows for selection of product and code entry

VAULTS

Three different models are available for your bay meter. All are extremely durable and made of stainless steel with maximum security locks. Capacities range from \$400 to \$1500. A split cash drawer is available for those operators who would like to use tokens as well as coins. A stainless steel vault extension allows you to recess the vaults into a concrete column or base giving you that added protection.

24040

- Dual Coin Drop - \$400 Capacity
- Stainless Steel Construction
- Abus High Security Lock
- Size: 12"W x 5"H x 8"D
- Weight: 15 lbs.

24050

- Single Coin Drop - \$600 Capacity
- Stainless Steel Construction
- T-Handle Lock
- Size: 9 1/4"W x 9 1/4"H x 8"D

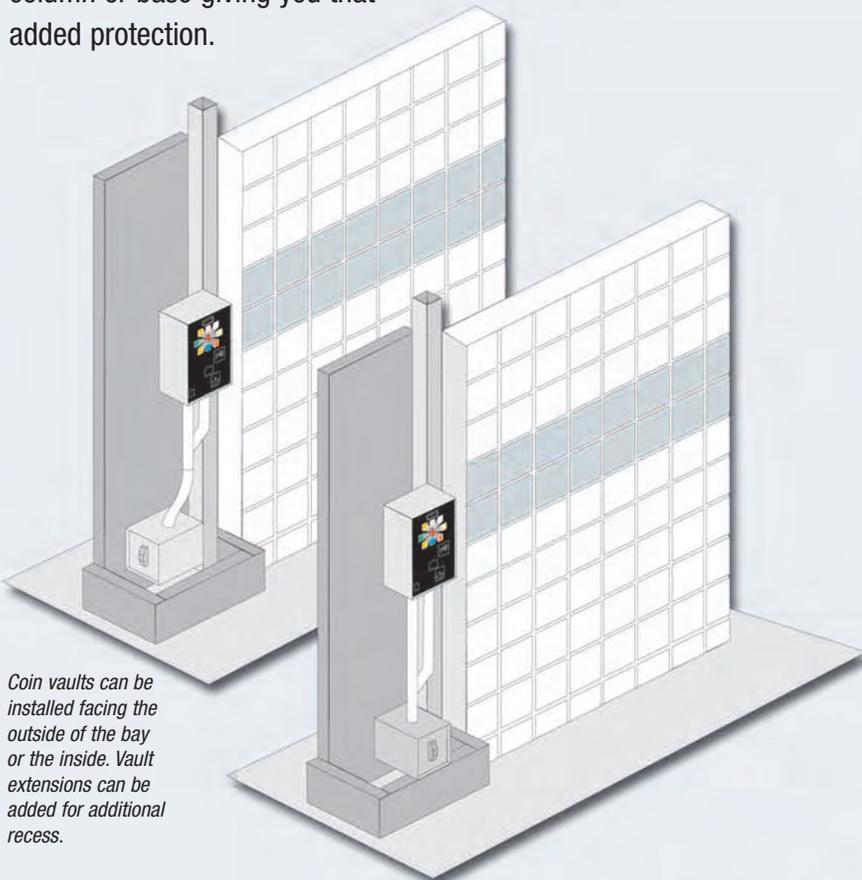

- Weight: 23 lbs.

24055

- Dual Coin Drop - \$1500 Capacity
- Stainless Steel Construction
- T-Handle Lock
- Size: 9 1/4"W x 9 1/4"H x 12"D
- Weight: 33 lbs.

Options

- 24060: Split Cash Drawer for Tokens and Quarters
- 24054 Vault Extension: 3" - 8" Adjustable Extension Collar

Coin vaults can be installed facing the outside of the bay or the inside. Vault extensions can be added for additional recess.

Optional

High Security Door Front for additional protection against vandalism and theft.

SWIPE-N-CLEAN™

The First Credit Card Acceptance System for the Self-Service Car Wash

Jim Coleman Company has kept with tradition in bringing you another innovative method of increasing sales and making the most from your invested dollar. Credit cards are the preferred method of payment in today's world. The Swipe-N-Clean™ gives your customer the opportunity to use the wash bay, the vacuums and purchase a variety of vending items with one swipe of their card! Once the card is approved at the credit card center, the customer can punch in the

“user code” issued to them on the push button meters at any of these functions. Once they are finished with one service, they simply move to another and re-enter the code for another type of service. When finished completely, they return to the card center for a detailed receipt. This is only the beginning. Read the following pages to learn about other income producing Swipe-N-Clean™ features such as Fleet Accounts, Frequent Car Wash Club and Mail-A-Card.

The multi-talented credit card acceptance system for your entire self service car wash. (Please note that bay marketing meters, vacuums and electronic vending must include Select-N-Touch keypads.)

The Swipe-N-Clean™ at this location is located near the vending products and bill changers for easy “one-stop” shopping.

Awnings and signage that advertise the Swipe-N-Clean™ help promote it.

SWIPE-N-CLEAN™

Features

- Accepts All Major Credit Cards
- Colorful flat LCD Display monitor
- Vibrant Sound with Verbal Instructions.
- Voice and Photos can be customized.
- Colorful Graphics for User Awareness
- Digital Keypad
- Protected Card Reader
- Heavy Duty Stainless Steel Construction
- Multiple Data Reports
- Reports available on-line
- Fleet Codes
- Pre-Pay Option
- 110 VAC powered
- Printed receipt
- E.T.L. Approved

With just a swipe of a credit card, customers can use the car wash by inputting a user code.

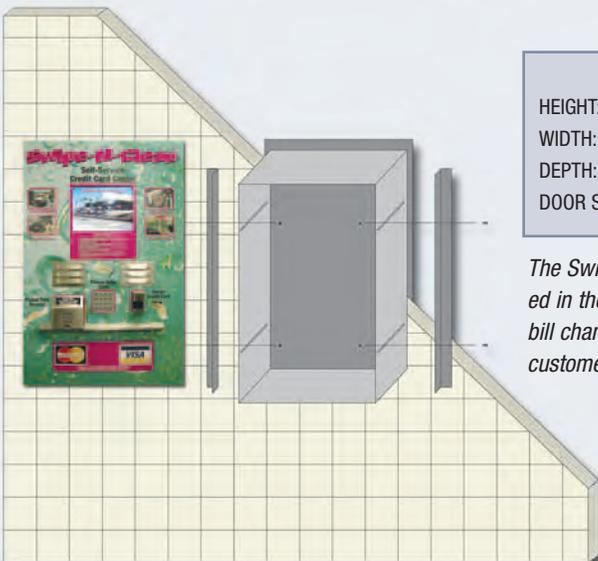

Customers can easily input their user code to use any bay service.

Customers can also use vacuum, shampooer and fragrance machine with their user code.

For a printed receipt, the customer enters his or her user code.

	CABINET	FACEPLATE
HEIGHT:	40"	44"
WIDTH:	25"	27"
DEPTH:	13"	N/A
DOOR SWING:		LEFT TO RIGHT

The Swipe-N-Clean™ is typically located in the equipment room and near the bill changers for easy installation and customer use.

CABINET MOUNTING DATA

FLEET ACCOUNTS

A marketing tool made for the business-to-business accounts.

Local businesses are great targets for your fleet accounts. Many of them will have a fleet of commercial vans, trucks or cars.

The **SWIPE-N-CLEAN™** has a unique way of marketing to business accounts. The FLEET WASH PROGRAM enables car wash operators to issue wash codes to the multiple vehicle commercial businesses. It saves business owners from giving employees cash or credit cards for keeping the company vehicles clean and washed. It also puts an end to employees turning in cash receipts. The FLEET WASH PROGRAM will provide

employees the ability to have a totally cashless procedure. Each transaction will be stored in a computer in the equipment room where you may view it there or at a remote location. The SWIPE-N-CLEAN™ will give you the ability to view all transactions showing time, date, identity of each user and total amount spent. This gives the business owner the ability to keep his fleet cleaner and pay one monthly bill.

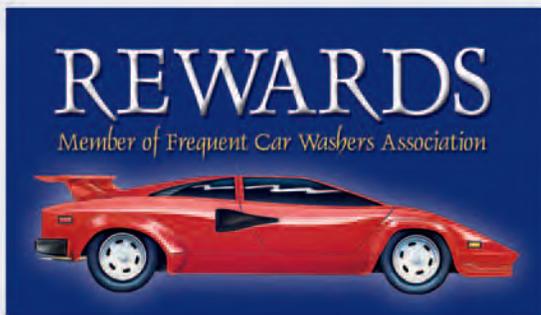

FREQUENT CAR WASH CLUB

A great marketing tool for creating a database for your car wash.

The **SWIPE-N-CLEAN's** technology also brings you the fun of creating your own FREQUENT CAR WASH CLUB or REWARDS program. Simply by inputting a 6-digit code, your customer can have the privilege of a car wash club membership. Because the SWIPE-N-CLEAN™ can record data, you are able to create a database of your members. The code will identify your customer and works similar to a debit account. Members pay for wash pack-

ages and earn free or discounted washes, vacuums or promotional gifts....you choose the prize! Not only will you have a list of car wash users, but you will have created a targeted segment of your market in establishing product use and purchase behavior. The car wash club cards are custom designed for your site and may be purchased from Jim Coleman Company, or you can create your own.

The Frequent Car Wash Club also can be used in conjunction with pre-printed T-shirts for you and your employees to wear to help promote membership in the club. Call for a quote.

MAIL-A-CARD™

The only marketing tool for direct mail in the car wash industry that can create a customer database is the SWIPE-N-CLEAN™. The MAIL-A-CARD™ program uses the advanced technology of the SWIPE-N-CLEAN's™ data program to generate thousands of random codes to be printed on the direct mail postcard. The recipient then uses the code at the car wash to receive his discounted wash, free wash, or promotional gift.

You then can match the

codes that were used from the postcard with your mailing list. With this information, you now have a customer database that you can use again and again. Just send us 4-5 photos of your car wash, the address, and the codes generated from your SWIPE-N-CLEAN™, and we will do the rest. We will design your postcard, generate the demographics and mailing list, combine the list with your codes, and send them out first class mail. Average response is 4-12%, depending on targeted market.

FREE CAR WASH!

BIG STATE Water Works

TOUCHLESS AUTOMATIC

TurtleWax

BECAUSE CAR WASHING IS FUN!

www.bsww.ws or email: info@bsww.ws

The key to a successful direct mail program is to create action.....make an offer. Here the operator offered a free cycle in the self-serve bay but also used the 4 x 6 postcard to promote vending supplies, vacuums and the automatic as well as informing you that all equipment accepts the Golden Dollar.

Direct Mail
that works
for you and
your
customers.

MAIL-A-CARD™

A simple and
cost effective
method for
creating a
database of
customers.

HOUSTON, TX
PERMIT NO. 4885

Mr. John Doe
1234 Main Street
Houston, TX 77777

Code: 998877

Input your 6-digit code in any wash bay followed by the # sign for one **FREE SELF-SERVE** cycle.

Offer expires one month from receipt.

The back of the card is printed in black only and has a detailed description of your offer along with instructions for the customer on how to input the code. This car wash operator also offered a free cycle in the self-serve bay and took advantage of promoting the entire car wash. Bright colors, photos and easily read text are three main components in creating a dynamic piece of mail.

INCOME MONITORING SWIPE-N-CLEAN™ ON-LINE REPORTS

At any given time or day, you may print reports from your home or office computer that allows you to access reports on credit card deposits, door and light activity, bill changer status, fleet transactions, function reports on bays, automatic, vending or vacuums, summary reports, and site locations data.

By using colors that coordinate with each other on your awnings, tile, brick, roof, signs, and decals, you can create a masterpiece car wash.

The Design Department can help evaluate space and determine lay-out.

By adding beautiful and healthy plants, trees, and flowers, your car wash will have an exquisite landscape that will surely improve the appearance of your site.

Making the most of your space can lead to bigger profits.

SITE PLANS

Using state-of-the-art software, Jim Coleman Company's Design Department will take you from a conceptual site plan to a complete set of construction drawings. Using many years of design and drawing experience and today's cutting edge technology, your facility is but a few mouse clicks away. We can work hand in hand with your engineers and architects to ensure you the highest quality car wash facility.

93000 VACUUMS

The 93000 Series Super Vacs are oval in shape and are made of stainless steel construction. All are equipped with Countdown Timers and Electronic Coin Acceptors. The Super Vac is also available in combination with a Hot Foam Shampooer or a Misty Fragrance Machine. Your choice of dome color, decal graphics, and awning will enhance the look of your vacuums.

Countdown Timer

Countdown Timers display time, price, coins deposited, remaining time, and last coin alert. The optional "Commander" remote control allows you to change price and time and access coin count and cycle counts at the touch of a button.

High Security Vault

A \$300.00 capacity vault with removable stainless steel cash drawer for ease of collection.

Optional High Security Bar and Lock

Dome & Hose Color

All vacuum domes, round and oval are available in Forest Green, Red, White, Blue, Magenta, Yellow and Teal. Hoses come in teal, yellow, gray, red/blue combo, black and red.

93000 SUPER VAC

93040 FRESH-N-VAC

93050 SCRUB-N-VAC

Optional Decals

Vacuum decals available in Midnight Blue (as shown) or Teal meter fronts with matching side decals.

94000 VACUUMS

State-of-the-art equipment from an industry expert, the 94000 Series Vacuums are constructed of high quality, stainless steel. Our affordable dual-function vacuums mean long life, dependability and a higher return on your dollar than any other equipment. Round in shape, the 94000 Series Vacuums make an attractive vacuum at your car wash with your choice of dome color and matching decal graphics.

94040 COMBO VAC & MISTY FRAGRANCE

94000 ROUND VAC

94050 COMBO VAC & CARPET SHAMPOOER

Bill Acceptor
Increase vacuum income by simplifying the payment process. Customers use \$1 and \$5 bills, coins and/or codes.

High Security Lock
This optional lock will help reinforce the dirt door to deter vandals from "buried treasures" that may be in the dirt bag.

High Security Lock
Get extra protection and peace of mind with a hardened, stainless bar guarding your cash drawer.

Domes, Hoses and Decals
Like the 93000 Series Vac, you have your choice of translucent dome color or hose color. Meter front decals are available in Teal or Midnight Blue.

SINGLE UNITS

Features

- 18 Gauge Stainless Steel Body
- Fuse Protected
- 2" Vacuum Hose and Cuff
- Solid State 110V Adjustable Timer
- Test Switch
- Self Cleaning Filter Bag
- 2 - 1.6 H.P. Vacuum Motors
- Dual Latch clean Out Door
- Your Choice of Dome Color

Standard 92093 Vacuum
is our economy vacuum that still gives you a powerful vacuum. It does not come standard with the graphic decals or digital timers.

SINGLE UNITS

The **28010 Hot Foam Carpet Shampooer** and the **46010 Misty Fragrance Machine** provide all the benefits of the 94040 and the 94050 models but without the vacuum. Both units are made of durable stainless steel and have electronic coin acceptors. These units are available with a pedestal or pole mount.

RIGHT: The single Misty Fragrance Machine at this car wash is mounted on a pole.

VACUUM ISLANDS WITH CUSTOM GRAPHICS

Colorful Graphic Decals for Your Stainless Steel Vacuum Base

Custom vinyl decals can help promote your site by use of bright, color-coordinating colors. You can also place your logo or website on these bases for some extra advertising. See page 36 for sample designs or send us a vector formatted file of your logo.

VACUUM ISLANDS

Stainless Vacuum Islands are very popular at today's car wash. They are attractive in design and color and are quick and easy to install. Typical masonry vacuum bases can be costly and time consuming to construct. Stainless steel vacuum islands arrive at your wash site ready to bolt down and cap off with concrete. Vacuum anchor bolts, trash can holder, and awning pole receptacles are set in precise position. You can choose between different combination units, single or double vacuum, decal design, awning and lettering color, trash can cover style and vending options. Custom designed to fit your location, stainless vacuum island make it easier to get even more profits from your wash.

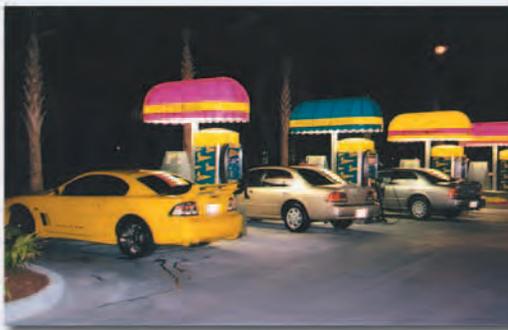

SINGLE VAC ISLANDS

Easy to Install Base

Stainless steel vacuum bases are ready to bolt down and fill with concrete. Expedite construction installation.

DOUBLE VAC ISLANDS

Lighted awnings over your vacuum islands help in nighttime use and helps the customer feel safer.

Double Vacuum Islands are ideal for offering more than just the vacuum. They can offer fragrance machines **and** hot foam carpet shampoos, and they allow more customers to service their car since you can have a car on each side, which is great where space is an issue.

These single vac islands are eye-catching in color and are available with the standard trash can cover.

Mat clamps allow customers to easily clean car mats.

Standard "arc" style trash can toppers help keep the trash from blowing out of the can.

Trash can toppers in the "V" style with mat clamps make mat cleaning and shampooing easy.

VACUUM ISLANDS

Single Vacuum Island With Handicap Base

Oval vacuum with Misty Fragrance and mat clamp trash can cover. The 2-tiered vacuum base meets ADA requirements.

ACCESSORIES

Fragrances

You can choose up to three different scents for your fragrance machine.

VENDING ISLANDS

Made to order, Vending Islands create a tremendous profit center for your car wash in just a small amount of space. Available in wall-mount, hexagon, octagon, single-sided, or double-sided configurations, Vending Islands offer your customers a variety of car care products and you make more money! All units are available with optional high security vaults.

SINGLE-SIDED

DOUBLE-SIDED

Vending Islands are perfect profit centers for small spaces.

COMBO VAC & VEND

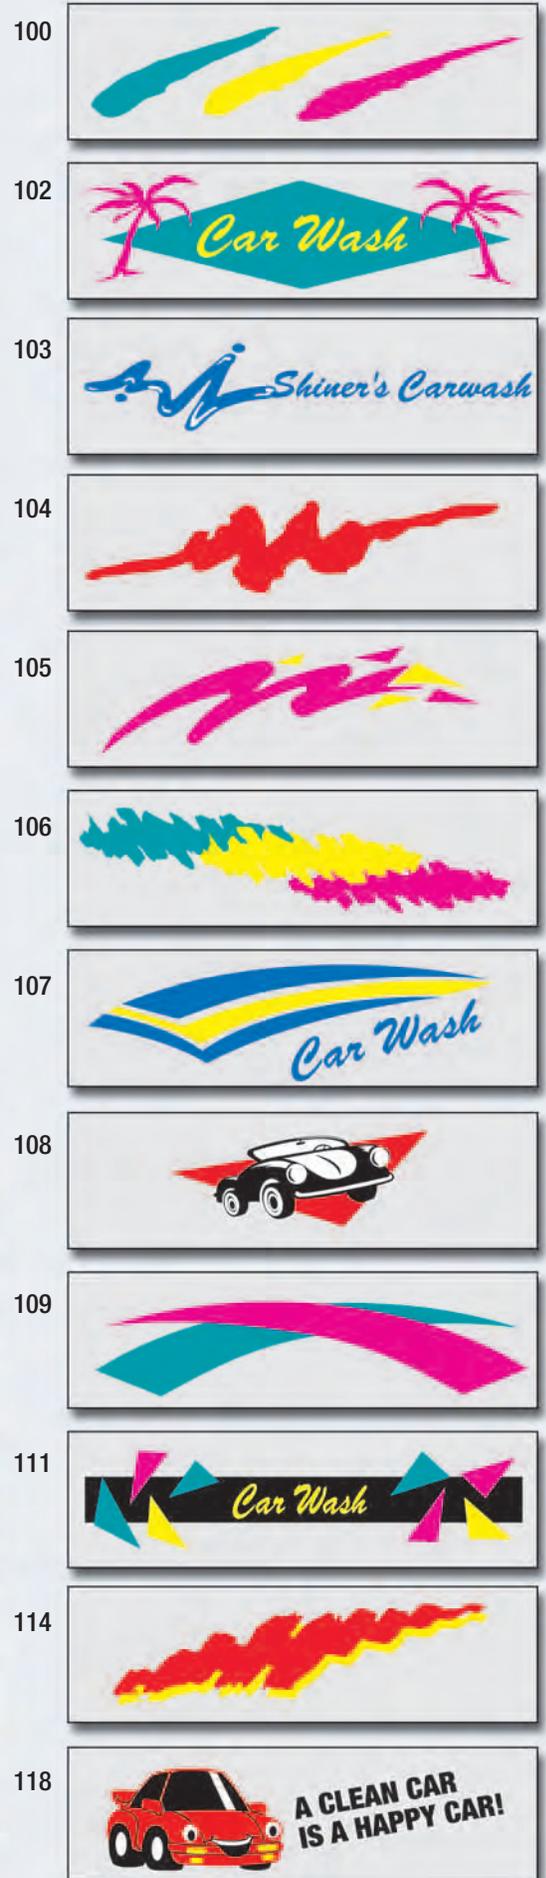

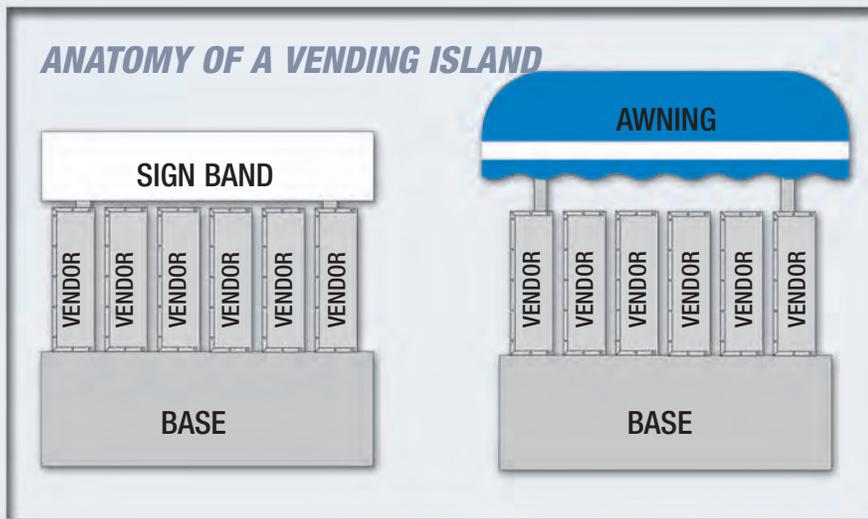

**Combination Vacuum and Vending
Create a Great Profit Center**

Combo Vacuum and Vending Islands can add great curb appeal to your location. It's one-stop shopping before or after washing your car.

GRAPHICS FOR BASES & BANDS

Choose one of these designs for your vending island base, sign band, or vacuum base. We can custom design one with your theme or logo.....any color scheme you like. Your car wash will look brighter and more colorful by

adding vinyl graphics to your equipment. You can even add street addresses, telephone numbers and web address to your design. Just another way to promote your car wash! These graphics are also available for your vacuum island bases.

These mansards are available in several colors. Custom graphics bring it to life by promoting car washing, your services, and products.

Mansards provide a uniform look that surrounds the car wash and brings the color scheme together for visual appeal.

MANSARDS

Constructed of aluminum tubing and outdoor vinyl, mansards not only serve as an architectural element, but also as a highly visible part of the car wash site to promote your products and services. By adding eradicated signage, the mansards give your site a one-of-a-kind look. These mansards are also lighted for nighttime advertising and attraction.

Custom mansards add a contemporary look to your car wash site.

AWNINGS

From the first phase to the last, the manufacturing of an awning has the customer in mind. Working from conceptual drawings generated by the Graphics Departments, skilled welders shape durable, lightweight aluminum into the design specifications of the framework. All awnings are complete with your choice of color and graphics.

VALANCE STYLES

AWNING STYLES

Whether it is a convex, concave, bullnose or an elongated-shaped frame and designed to shelter a vacuum, vendor island, or doorway; the frame is unique to the purpose and position of the awning. You also decide what color combinations you would like to use, and with all these choices, your awning will be your own creation. See your sales representative for awning color selection.

• BANNERS

With endless choices of color and designs, you can create your own CAR WASH BANNERS.

Displaying these colorful banners are a quick and easy way to promote your services, products and car washing. They are made of the same vinyl fabric that we construct our awnings and Diamond Signs with, giving it longer life than most “store-bought” banners, and you can color coordinate them with your car wash. CAR WASH BANNERS are available in a standard 2' x 6' size, however, any size can be made. Double-sided banners are also available along with vertical banners for hanging on poles.

Banners are a great marketing tool for promoting car washing, products and services. Because we make our banners from the same heavy-duty material as our awnings, all of our banners can be color coordinated to your wash and last much longer than commercial banner material. You can display them just about anywhere at your car wash.

Vertical banners can be placed around your car wash promoting products and services.

Market Your Car Wash With Colorful Banners

.....

Promote Your Services, Products, Grand Openings and More

Diamond Signs have great impact when placed on mansards, buildings or fences.

These uniquely shaped signs are an "eye-catcher" for adding color to your car wash site.

DIAMOND SIGNS

Made of aluminum tubing and vinyl, DIAMOND SIGNS are the newest promotional and marketing tool at today's car wash.

DIAMOND SIGNS are made to color coordinate your wash, therefore, adding visual appeal and informing your customers of products and services. Choose any design and any color combination, and you've just created your very own DIAMOND SIGN for your car wash.

They are available in approximately 4' and 8' widths and can be easily installed on your building, fence or mansard. They can also be mounted on posts for displaying in landscaped areas.

Turn an ordinary fence into a colorful billboard by promoting your products and services

*Market Your Car
Wash With
the Original
Diamond Sign*

*A Business
Without a Sign Is
a Sign of No
Business*

CUSTOM SIGNS

Foam molded mar-
 quees to outdoor
 signs and posters,
 custom signage is the key to
 personalizing your car wash.
 Aluminum "pop-out" frames
 allow you to change your
 message as often as you like
 with pre-printed posters.
 Menu signs can be custom
 designed with your logo,
 theme and prices. Signs can
 teach, inform, promote, and
 direct, so displaying signs at
 your site can improve cus-
 tomer relationships and

make your location more
 visually appealing.
 Depending on the message,
 signs can be strategically
 placed on a wall, your
 mansard, on a fence, in your
 landscaping, or near the bill
 changers which is a central
 location for most customers.
 Our selection of signs can be
 color coordinated to match
 your car wash, thus creating
 an even more uniformed
 look. Our design department
 can create a unique look for
 you.

*Custom sign size
 and color are also
 available.*

*Signs are printed on aluminum,
 lexan and other outdoor material.*

Poster in black aluminum "pop-out" frame.

IN-BAY SIGNS

The importance of in-bay signage is to inform the customers on how to use the products and/or to promote the products. With all of today's in-bay options, a customer can become overwhelmed with the choices. By using signs inside the

bay, it will be easier for the customer to understand each products use. Pictorial images of the product in use work best, but a "menu board" of product description will also aid the car wash user.

In-bay signs can be a great marketing tool when promoting functions in the bay. Bay walls create space for displaying signs on pricing, warnings, instruction and direction.

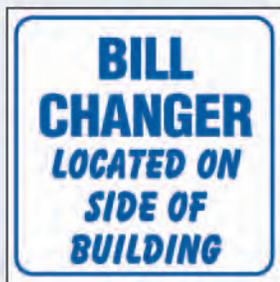

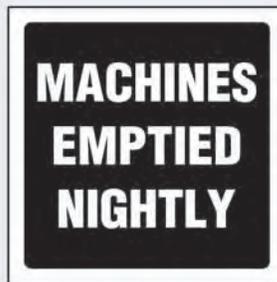

Promotional and instructional signs can enhance the look of your otherwise bare bay walls.

STOCK SIGNS

Signs have many functions. They can be used to promote and advertise your car wash or your car wash services. They can also be used for directions and instructions throughout the site, and, in some cases, you can use them to politely inform customers on the

rules of your location. Whatever the case, we have a sign for you.....these are just some of the selections. All signs shown are on white aluminum with most measuring 12" x 12". Your choice of colors and text is also allowed. (Custom signage may be subject to price

PROMOTIONAL APPAREL

You and your employees will look dynamite with these car wash shirts. Not only does it create a more professional look, but by wearing color coordinated apparel you can promote your car wash. Hats to match will “top” it off for a complete color coordinated look.

Available in several colors and denim, these car wash shirts can be custom printed. Other items such as T-shirts, sweat-shirts and jackets are also available.

Style and/or color of shirts may change with season and supplier availability.

- Detailed accounting reports.

ENTRY WIZARD

Automatic Entrance Controller

The Entry Wizard is an impressive experience for your carwash customer. It welcomes them with a vibrant greeting and then gives instructions and options. A brightly lit touch screen provides the visual and a pleasing voice informs them of choices to be made. With the PC based software, you can modify all Entry Wizard screens and voice files to work with your carwash design and color schemes. These multi-media

features also let you sell advertising or promote other products and services your site has to offer.

All forms of payment are accepted. The average per wash income is increased when customers can pay with credit cards, coins, bills, user codes or any combination thereof. In addition, the Entry Wizard offers the most comprehensive fleet code and pre-pay systems in the industry.

The Entry Wizard is also available with coordinating graphics to the custom graphics of the Water Wizard.

Features

Entry Wizard Benefits

- The Entry Wizard Entrance Controller is another salesperson at your wash. A talking display that promotes your wash 24 hours a day.
- On screen promotions are sure to increase sales! Multi-media features talk to your customer and let them see what you have to offer.
- Fleet accounts create an easy way to promote your wash to organizations with multiple vehicles.
- Pre-pay is a great tool to sell washes in advance. Customers use this feature for gifts, their kids, employees or just to make it convenient for themselves.
- Both Fleet accounts and pre-pay washes expedite the payment process. This will increase the number of cars per hour and improve your wash income.
- Increases business by accepting credit cards, bills, coins, and code entry.
- Entertain your customers while they are waiting to wash.

Select Screen.....go directly to the wash menu, use a code, get answers on how to or use a pre-paid account.

ENTRY WIZARD

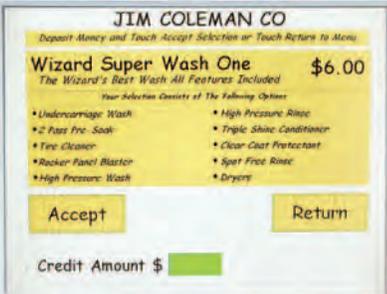

Touch screen for administration of Entry Wizard functions.

When code entry is selected, this screen allows you to enter a 6 digit code which will bring up the wash menu and show credit amount.

Touch screen for selection of desired wash from the wash menu.

A complete description of the selected wash is detailed on the screen. Customer can accept this wash or return and make another selection.

Touch screen for pre-pay washes. This features allows you to collect money in advance by preselling wash packages.

STANDARD FEATURES

Every Water Wizard 2.0 touchfree automatic is loaded with standard features. It includes most of the customer requested features and then some. Every unit is equipped with Undercarriage and Rocker Panel Sprayers.

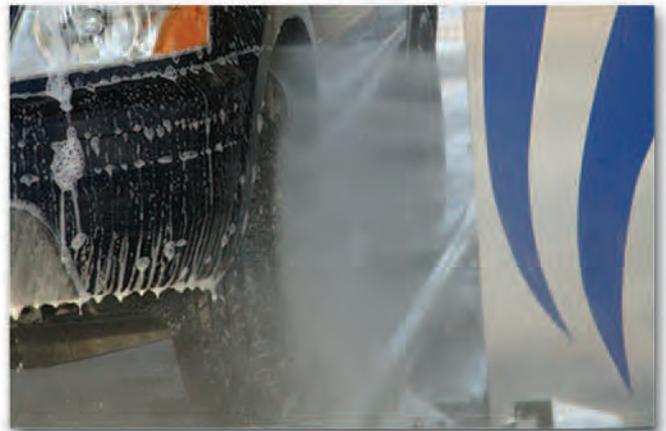

The undercarriage provides a high pressure under the vehicle wash. It can be on or off during any wash cycle. The On Board Rocker Panel Sprayers thoroughly clean the wheels, tires, and lower part of the vehicle with controlled efficiency.

High pressure undercarriage wash.

The specially designed wash boom with high impact, zero degree oscillating nozzles will rotate and attack the dirt on the front and rear of the vehicle. An additional "Bug Pass" can be programmed, front and rear, to provide extra cleaning when seasonal changes require it.

On-board Rocker Panel Blasters thoroughly clean the target area

The gantry mounted scrolling Wizard Message sign displays informative messages to the customer.

The brightly lit LED scrolling sign and Enter Now/Please Wait bay entrance sign are in constant communication with the customer in the bay and the person next in line.

STANDARD FEATURES

The scrubbing action oscillating nozzles are among the many advantages provided standard with the Water Wizard 2.0. Moving the high pres-

sure water so it attacks the dirty vehicle from different angles serves to peel the dirt away and get into areas that straight on spray patterns do not touch.

The scrubbing action oscillating nozzles sweep back and forth over the entire vehicle as the wash gantry passes over the vehicle.

Presoak nozzles are independent of the high pressure nozzles providing an effective and efficient delivery system. The nozzles change direction as the gantry moves to ensure a complete covering even in hard to reach areas.

Presoak is applied on both sides and the top simultaneously.

Note the incredible coverage and the unique application. As the gantry travels, a smooth even blanket of hot presoak coats the vehicle loosening grime and dirt.

SCRUBBING ACTION OSCILLATING NOZZLES

The vehicle is being scrubbed clean with high pressure water.

The entire vehicle will receive a good scrubbing as the high pressure water creates friction upon impact with the vehi-

cle's surface. The back and forth motion of the zero degree oscillating spray pattern attacks the dirt and grime from all different angles.

Adjusting to specific vehicle dimensions ensures exceptional cleaning on subsequent passes.

AUTO HEIGHT ADJUSTMENT

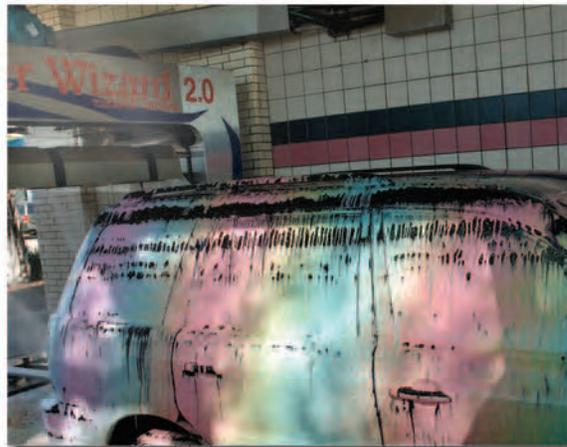

Clean lower height vehicles as well as you do full size SUV's! The Water Wizard 2.0's control system scans and profiles the height of each vehicle at the beginning of the wash cycle. The system will automatically adjust the wash boom to multiple vehicle heights.

ADDITIONAL PERFORMANCE OPTIONS

WIZARD CONTOUR SYSTEM

Now the contouring option takes command. Observe how closely the wash boom follows the contour of the vehicle, maximizing the scrubbing action of the high-pressure wash. Every vehicle that enters the Water Wizard 2.0, regardless of vehicle height, receives the same quality wash. Maximum cleaning in a touchfree automatic depends on quality hot presoak and good high pressure scrubbing action. Moving the nozzles closer to the vehicle during the high pressure passes produces consistent and effective cleaning power.

MAGIC OF TRIPLESHINE

Dazzle your customers with the magic of Tripleshine. Customers are amazed at the incredible array of colors as the specially designed applicator blends the Red, Gold and Blue conditioning foam into a soft, vibrant blanket to protect your vehicle's finish.

PREFERRED OPTIONS

- Wizard Contour System
- Magic of Color Triple Shine Foaming Conditioner System
- Air Assisted Foaming Tire Cleaner
- Auto Height Adjustment System
- Pre-Soak Heater System
- Two Step Pre-Soak Delivery System
- Circulating Pre-Soak System
- Zero Degree Oscillating Rocker Panel Nozzles
- Printer
- Auto Paging System
- Door Controls
- Winter Wizard Freeze Control System
- Entry Wizard Automatic Entrance Controller
- Hot Water High Pressure Wash
- Zero Degree Oscillating Nozzles on Wash Gantry

ADDITIONAL PERFORMANCE OPTIONS

Zero degree oscillating nozzles deliver an extra blast of cleaning power.

Zero degree Rocker Panel nozzles oscillate internally creating a 20-25 degree spray pattern with no moving parts.

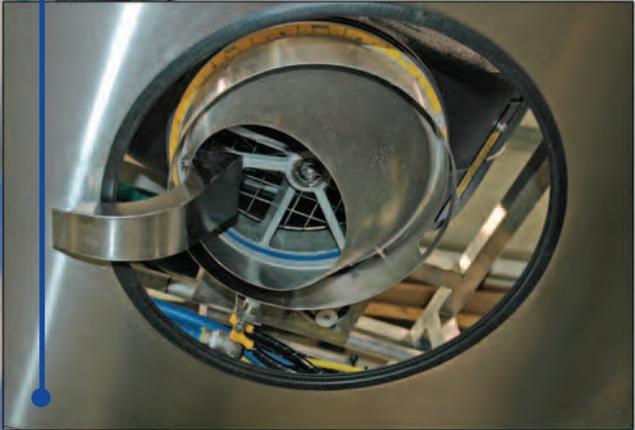

WHEEL BLASTER

On-board tire cleaning applications.

TIRE CLEANER

Wind Wizard on-board blower has three producers for complete vehicle coverage.

Center producers sweep distance is easily controlled

Side blowers can be easily adjusted for maximum performance.

Center producer rotates 360 degrees for perfect coverage on the front and rear of the vehicle. Air scoop helps to eliminate residual water from dropping on clean, dry vehicle.

WIND WIZARD

Complete the wash with an effective blower system. The Wind Wizard comes in an on-board package as shown or as a freestanding system. The programmable rotating center nozzle makes it easy and effective to dry the vehicle from both directions. The stainless steel re-enforced molded housing provides greater safety and less noise.

FEATURES

(On-Board Blower)

- Stainless Steel Re-enforced molded producer housing for greater safety and less noise
- 10 HP TEFC Motors with Welded Steel Fans
- Open Design Allows Easy Access
- Dynamically Balanced Fan
- Can Dry Vehicle from both Directions
- Programmable Rotating Center Nozzle
- Heavy Duty Stainless Steel Safety Screen

- Includes Motor Starters
- Air Flow: 10 HP Motor – 3,800 CFM Per Nozzle
- Air Speed: 155 MPH
- MacNeil Blower

(Floor Mount Blower)

- Same features as on-board blower except motor starter package is optional
- Overall Height: 127 1/2"
- Overall Width: 184 1/2"
- Maximum Clearance: 90" High X 115" Wide

BUILT TOUGH

The Water Wizard 2.0® wash gantry is constructed of a stainless steel framework and is built to last for many years to come. Quality craftsmen construct each frame to exacting standards insuring a consistent product.

Wide Open Spaces

Most components have easy access to inspect and to perform preventative maintenance, as shown in the cut-away picture. Side panels are completely removable making servicing the Water Wizard 2.0 a simple task.

Stainless Skins

Over the stainless framework is a stainless steel skin. It is an attractive, durable and easy to clean protective covering. Because the stainless skin is a renewable surface, gantry custom graphics can be added or changed at any time. This will give your Water Wizard a fresh new look for a minimal cost.

Features

- Adjusts to the length of the vehicle (Auto Height or Contouring Optional)
- Time Saving Presoak and Spot Free Delivery System
- All Stainless Steel Frame and Gantry
- Cat 3535 Pump with 25 HP Motor
- High Pressure Rocker Panel Sprayer On-Board
- High Pressure Undercarriage Spray System
- 3" Aluminum Guide Rails
- Galvanized Railroad Style Gantry Track
- SS Scrolling Message Sign on Gantry
- SS "Please Wait" and "Enter Now" Sign
- SS Chemical and Water Holding Tank
- Independent Foamy Presoak System
- Automatic Chemical Mixing System
- SS Electrical Control Center
- Web Enabled Operator Interface Allows Complete Control
- Manual Override for Gantry Operation
- Water Saver Medium Pressure Rinse

TOTAL OPERATOR CONTROL

Water Wizard 2.0 Pumping Unit
with Electrical Control Center

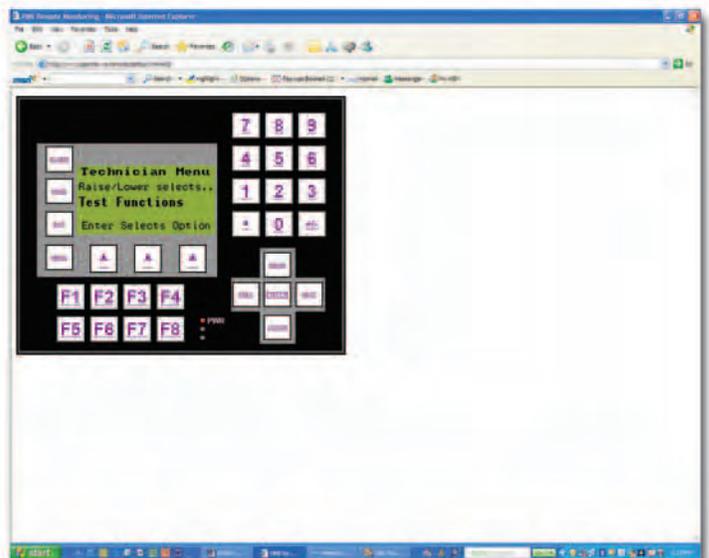

The comprehensive Operator Interface Panel, located on the electrical control unit, puts you easily in charge...either on-site or via the web. It is so simple to use and a great tool to use when designing wash recipes or trouble shooting. Critical areas are password protected

The Water Wizard 2.0 pumping unit is a modular, compact equipment package. Mounted on a stainless steel framework are the pumps, motors and chemical mixing systems that are pre-plumbed and pre-wired and ready to go.

WEB ENABLED

Multiple menus enable you to review and modify wash recipes, adjust timers and counters, view revenue, observe system operations, monitor electrical equipment and test any of the wash's functions. Other options such as blowers, door controls, reclaim systems and other support equipment are also easily controlled with the Operator Interface Panel.

Possessing web enabled capabilities permits complete access to system controls for monitoring or troubleshooting anyplace web access is available.

ONE BAY AUTOMATIC

Custom graphics lets you match the look of your Water Wizard 2.0 to your wash design.

TWO BAY AUTOMATIC

AUTOMATIC CARWASH SITE DESIGNS

Get the most out of your location. Study the demographics to decide if your site needs one, two or even three automatics to maximize its income producing potential. Depend on a knowledgeable Jim Coleman Company distributor to work with you to develop your plan.

RETROFIT AUTOMATIC

Converting a self serve bay to a Water Wizard 2.0 automatic attracts new clients and typically produces 3-5 times the income of a single self-service bay.
